

Wire Halyard

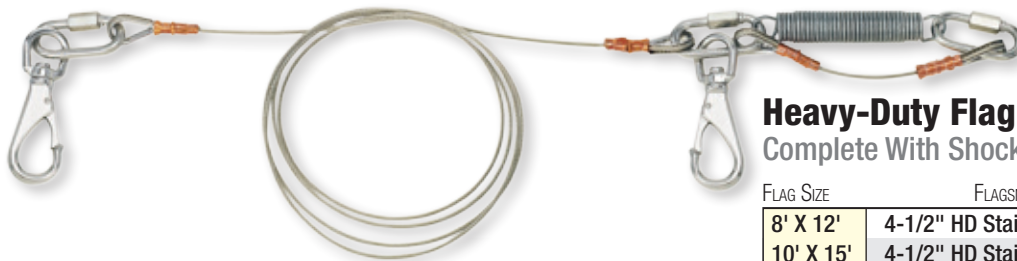

Concord American Flagpole offers a complete line of Wire Cable products for use with Internal Halyard systems. Each are constructed with Stainless Steel Wire Strand Aircraft Cable specifically chosen for its combination of high breaking strength, fatigue resistance, flexibility, and extreme corrosion resistance under the harshest exterior environments. Use with Internal Halyard Winch System Flagpoles only.

Flag Arrangements are constructed of stainless steel aircraft cable with two (2) copper crimps securing stainless steel yokes at each cable termination point. A Stainless Steel Swivel, two (2) Stainless Steel Flagsnaps, and two (2) Stainless Steel Connecting Links complete the assembly.

Flag Arrangement - Complete Assembly For Use With Wire Cable Based Internal Halyard Winch Systems

FLAG SIZE	FLAGSNAPS	PART NUMBER
2' X 3'	3-1/2" Stainless Steel (2)	FSA-0203
3' X 5'	3-1/2" Stainless Steel (2)	FSA-0305
4' X 6'	3-1/2" Stainless Steel (2)	FSA-0406
5' X 8'	3-1/2" Stainless Steel (2)	FSA-0508
6' X 10'	3-1/2" Stainless Steel (2)	FSA-0610

Heavy-Duty Flag Arrangements incorporate a Shock Spring Assembly into our standard Flag Arrangement. Containing a Shock Spring, Shock Spring Safety Cable and additional Stainless Steel Connecting Link, this heavy-duty design for larger flag sizes reduces the strain placed on both halyard components and flags.

Heavy-Duty Flag Arrangement Complete With Shock Spring Assembly

FLAG SIZE	FLAGSNAPS	PART NUMBER
8' X 12'	4-1/2" HD Stainless Steel (2)	FSA-0812
10' X 15'	4-1/2" HD Stainless Steel (2)	FSA-1015
12' X 18'	4-1/2" HD Stainless Steel (2)	FSA-1218
15' X 25'	4-1/2" HD Stainless Steel (2)	FSA-1525
20' X 30'	4-1/2" HD Stainless Steel (2)	FSA-2030
20' X 38'	4-1/2" HD Stainless Steel (2)	FSA-2038
30' X 50'	4-1/2" HD Stainless Steel (2)	FSA-3050
30' X 60'	4-1/2" HD Stainless Steel (2)	FSA-3060

The Shock Spring Assembly with Safety Cable contains a Shock Spring and Shock Spring Safety Cable. Use as a replacement Shock Spring Assembly for existing Heavy-Duty Flag Arrangements, or combine with an additional Stainless Steel Connecting Link (See Page 82) to turn any size Flag Arrangement into a Heavy-Duty design.

MULTIPLE FLAG OPTIONS

To fly multiple flags on a single flagpole, order the desired Flag Arrangements and a Stainless Steel Connecting Link. It is recommended that an additional Retainer Ring Assembly be used at the junction of the two (2) Flag Arrangements.
