

Stainless Steel Truck Spindles

For Revolving Truck Assemblies

Stainless Steel Spindles are strongly recommended for special applications that put considerable stress on the truck and spindle assemblies. Examples include large Eagles, tall flagpoles, roof mount applications, flagpoles flying extremely large or multiple flags and high wind areas. Several spindle lengths and NPT thread size combinations are available. **Contact Customer Service for availability and specification assistance.**

Red Beacon Light Assembly External Halyard Systems

FAA approved Red Beacon Light Assemblies for External Halyard Systems are available in Light Bulb and LED styles in both Single and Double Lens options. Bulb(s) sold separately for the traditional Light Bulb style. ***LED style options include bulb(s) and have a 5-Year Warranty. LED bulbs cannot be replaced.**

All options incorporate 3/4" NPT internal threads and require the use of both the Heavy-Duty Truck Assembly TRK-9420 (*or TRK-9975*) and Stainless Steel Spindle TRK-5120 (*both sold separately*). Heavy-Duty Truck and Stainless Steel Spindle will be modified and assembled at the factory.
