Universal Flagpole Cleat

The Universal Flagpole Cleat is designed to fit virtually every flagpole's existing drill hole pattern. CLT-UNV uses high strength acetal copolymer construction and stainless steel hardware providing exceptional durability and stability for any flagpole application. This cleat is engineered to withstand harsh weather conditions, ensuring even the most challenging environments. The improved horn angle allows for more halyard wraps while allowing for the standard logo or custom logo of your choice to remain clearly visible. They are perfect for both commercial and residential flagpole's.

Key Features:

- **Delrin (Acetal Copolymer Polyoxymethylene):** Known for its superior resilience, Delrin provides high wear resistance, ensuring these cleats remain reliable over time.
- **Custom Logo or QR Code Option:** Utilizing your vectorized artwork or artwork created by our office, we can custom engrave the cleat with your logo or QR code
- **Dimensions:** 8" overall length, 0.95" average width, 1.2" at each ends horn height
