

3/4" Liquid-Tight Connector  
for Metallic and Non-Metallic  
Type "B"

Simply push liquid-tight conduit  
over ferrule end of fitting. While  
pushing connector, turn conduit  
slightly clockwise to set it. To  
Remove, unscrew nut &  
dismantle

Qty. 3 Liquid-Tight Brass Cordgrips.  
Each cordgrip comes sealed with a black rubber cap. To  
use, loosen the cap end and remove / discard the black  
rubber cap. Feed secondary wire into cordgrip and  
tighten down to ensure a sealed connection. Leave  
remaining caps in place if additional cordgrips are not  
being used.

**\*\*Handtighten unused cordgrips. Do not overtighten.**

A 40 Watt driver is mounted inside.  
Primary will cover 120-277VAC on the **Blue** /  
**Brown** wires.  
Secondary is 24VDC. Positive VDC is **Red**.  
Negative VDC is Black

\*All cord grips were installed  
"water-tight" by the factory. When  
installing secondary lighting  
load, be sure to tighten the cord  
grip in order to ensure a water tight  
connection\*
